

TORQEEDO 1103 TRAVEL O/B
3HP
\$2,948

With its integrated lithium battery and outstanding efficiency, our Travel is a great alternative to any small petrol [outboard](#). It can do everything a 3 HP outboard motor can, but is lighter, cleaner, quieter, and more convenient.

Moreover, it easily propels tenders, dinghies and day-sailers up to 1.5 tons and, when required, even over long distances.

The new top-of-the range model Travel 1103 C comes with direct drive, a high-capacity 915 Wh battery and a range-extending 73% increase in capacity compared to the base model.

Greater power and durability, yet quieter than ever. The Travel 1103 C runs at just 33 DB – as loud as a whisper – and is the quietest motor in its class.
